Tall buildings can be seen in almost every big city in China. China is home to tall buildings and has five out of the world's top 10 tallest buildings.

But there will be fewer new tall buildings in the future. According to a recent government decision, China has stopped all cities from building new super-tall buildings except in special situations. This will help protect the country's traditional buildings and local culture. Experts said, "High-rise buildings will do bad to cities' local styles."

Besides that, building too many tall buildings causes other problems—like high daily costs and possible fire disasters. First, it costs a lot of money every day to keep these buildings looking nice. Also, if there's a fire, it's harder to save people on high floors. For these reasons, building fewer super-tall buildings not only keeps traditional buildings and culture safe, but also helps make cities better in the future.

M: I'm going to listen to a talk about manners in China. It's about to start.

第二部分 听短文，回答问题（听两遍）

Today, I'm going to tell you something about manners in different countries. For example, in the UK, people mustn't lift their bowl to their mouth when they are having soup. Noise is often not accepted when people eat, but in Japan, people needn't worry about making noise when they have soup. In the UK, people try not to put their hands on the table when having a meal. In Mexico, however, people should keep their hands on the table during a meal. In Arab countries, people mustn't eat with their left hand. This is considered to be very impolite. So watch what you do if you visit another country. You can ask the people there to help you or just watch carefully and follow them.

M: Well, we've collected 30 yuan more than yours, and I hope to get more in the following week.

第二部分 听短文，回答问题（听两遍）

My name is Lisa. I'm twenty-two years old. I'm a student of Sunshine University. Guess what? I also work as a volunteer at the local Children's Hospital. And I volunteer for two hours every Friday.

Last year, my sister Dina stayed in Children's Hospital for ten days. The volunteers there helped a lot. They not only took care of her health, but also helped her catch up with her studies.

I was really moved by the volunteers' work. So I decided to do something helpful to others. And now I'm one of them too. I help send lunches to the children and play games with them. I also make tea for their parents and talk with them. Through my volunteer work, I can make new friends and I feel quite happy with it. It's really a great job!

W: It will take place at the community centre on Sunshine Street—easy to find by bus.

第二部分 听短文，回答问题（听两遍）

Helping others is wonderful—it lets you learn new things and have fun. So how can you help?

There are three main ways to help. First, volunteering. That is to give your time to visit old people, walk dogs at an animal centre, or clean up a park. Second, raising money. That is to collect money by selling things like home-made cakes or doing part-time jobs in your free time. Third, donating. That is to give old toys or clothes to charities for sick kids or the poor, or give old books to a library.

Think about what you can do—small acts of help can make a big difference!

第二部分 听短文，回答问题（听两遍）

Good morning, everyone. I'm very happy to tell you that our very popular tree planting classes are starting again next week on Saturday, 18 September.

We welcome all children from 7 to 14 years old to join us, and parents are very welcome too. We'll meet at 8:30 a.m. in the town square and then walk to the rainforest. First, the children will learn about the plants and animals in the area. After that, they will help plant trees in different places and learn how to look after them. By planting and caring for trees, they can understand that it is important to protect nature. They can also see how their small actions make a big difference. Please remember to bring some lunch and something to drink. Looking forward to seeing you all next Saturday!

Changes around us

In the past few years, great changes have taken place around us.

As for travel, many people like travelling online instead of travelling abroad. Our studies are also changing. For example, more and more students show an interest in reading and more group work is done in class. More and more people have their own cars. And high-speed trains make people travel faster and more easily. Our environment changes a lot, too. The air is fresher and the water is cleaner. We often take a walk happily in the park.

In a word, our life is becoming better and better. We look forward to a better future.

My advice for an online museum

I would love to see famous paintings and ancient inventions in an online museum. To make the experience more exciting, the museum can use VR and three-D models so that visitors can view these objects closely. It can also include short videos to explain the stories behind the items.

Online museums are important because they allow people to learn about culture and history without leaving home. They are also helpful for students who can't visit real museums easily.

I think online museums are amazing and convenient. They make learning more open to everyone. I feel excited about this modern way of exploring the past.

Dear Tom,

Thank you for your email. The internet really makes our world smaller!

I love virtual tours because they let me "visit" places far away without leaving home.

Last month, I visited Lion Grove Garden online, a famous Chinese garden with a long history. With just a click, I could "walk" through the beautiful gardens. I saw small bridges over clear ponds and flowers blooming in the water. An online guide told me about the history of the garden. It felt like I was really there, breathing the fresh air and touching the ancient stones.

This experience made me love Chinese culture more. I hope you can visit it online to enjoy the beauty of our Chinese gardens one day.

Best wishes,

Li Hua

My green actions on our campus

Hello everyone,

Building a green campus is important. A clean and green environment can protect our health and save energy. Also, it teaches students to take responsibility for our planet.

I think we should start with small actions. For example, I will always turn off lights and fans when leaving the classroom to save energy. I will also use both sides of paper when writing or printing to reduce waste. In addition, I'll start a small "recycle corner" beside my desk to collect used paper and plastic bottles, and then hand them to the school's recycling station weekly.

A green campus activity will have good effects. More students will realize the importance of protecting the environment. A clean and eco-friendly campus will be created, and we'll study and live more happily here.

Let's work together for a green campus!

Thank you!

八、Sample writing:

The greener, the better

22 April marks Earth Day, reminding us to protect our planet. Nowadays, our earth is in trouble. There are many serious environmental problems. For example, the air

is polluted by cars and factories. Some rivers and oceans are filled with plastic waste, hurting fish and other sea animals. Also, more trees are cut down, leading to fewer places for birds to live.

We can do a lot to help solve these problems. First, we should plant more trees to clean the air. Second, we can use public transport or ride bikes instead of taking cars. Third, we must stop using too many plastic bags and bottles.

As a student, I will try my best to help. I will save water and electricity every day. I will also collect waste paper and plastic to recycle. Small steps add up! The greener our small acts are, the better our earth will be.
